

RT-CAD Prototypes >

With the new FDM-System we are able to create prototypes of ABS plastics directly from the PC without forming or time consuming programming within a very short time frame.

By request we deliver this prototypes smoothed and coated as well.

YOUR BENEFITS

- > shortened development times
- > low development costs
- > reduced tool costs
- > quick, fair priced launch of the products
- > early recognition of constructional faults
- > quick control of design and proportions

EXAMPLE OF USE

- > 1 to 1 prototypes
- > shrinkage extended prototypes
- > design samplers
- > samplers to cast
- > test control unit
- > architecture samplers
- > functional prototypes

... even limited-lot productions from 10 - 100 units can be produced in an economically way without a tool or any injection moulding form.

We are looking forward to your request!
